

Development

Help us develop GMAT

We believe the best ideas comes from collaboration. We do not have all answers or the final solution. But we believe in the idea and that we together can make a difference!

Please share the ideas and suggestions on how we can develop GMAT.

Here are links to other Development pages:

- [Compiling](#)

This section provides instructions to compile GMAT on various Operating Systems and using the range of options available.

- [Design Documents](#)

This section describes the core architectural design for GMAT.

- [How To Write New Components](#)

This section has the different How-To instructions to develop a new Plugin, a new Parameter, etc for GMAT.
